Warning! Hazard Risks!

Please read the warnings below for important safety information regarding your product. Failure to read these warnings or to follow the instructions below could result in personal injury or damage to your product that could void your warranty.

No Maintenance

This product does **NOT** require maintenance. Repairs should only be performed by authorized personnel. Please contact customer service (see p.7) if repairs are required.

Small Parts

In its unassembled state, this product contains parts that can be hazardous to small children. This product should be assembled by an adult.

Adult Supervision

This product is to be used under the supervision of an adult.

Climb Hazard

Do not climb on, hang from or suspend objects from any components of your product unless otherwise specified.

Indoor Use Only

This product is intended for indoor commercial use only. To reduce the risk of fire or electric shock, do not expose this product to rain or moisture. The internal components are not sealed from the environment.

Power Strip Specifications

Read your power strip electrical specifications. Only plug in devices that are approved for use with this power strip. Connect the supplied power strip directly to a wall outlet. **Do not connect to another power strip or use an extension cord.** Unplug when not in use. Turn off power strip before unplugging.

Electronic Equipment

Read the electrical specifications of any electronic equipment you are using with your Copernicus products. Failure to read these specifications and follow their instructions could result in damage to your equipment or personal injury.

Cable Trip Hazard

Ensure that any cables extending across the floor to your product are properly bundled and marked to avoid tripping or falling which may lead to personal injury.

Electrical Shock

Do not install or use the electrical components of this unit during a lightning storm.

Warning! Important Safety Instructions!

When using an electrical furnishing, basic precautions should always be followed, including the following:

Read all instructions before using this product.

DANGER - To reduce the risk of electric shock:

1. Always unplug this furnishing from the electrical outlet before cleaning.

WARNING - To reduce the risk of burns, fire, electric shock, or injury to persons:

1. Unplug from outlet before putting on or taking off parts.

2. Close supervision is necessary when this furnishing is used by or near children

3. Use this furnishing only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.

4. Never operate this furnishing if it has a damaged cord or plug, if it is not working properly, or if it has been dropped or damaged. Contact customer service for examination and repair.

5. Keep the cord away from heated surfaces.

6. Do not use outdoors.

"WARNING: Risk of Electric Shock - Connect this furnishing to a properly grounded outlet only. See Grounding Instructions."

Grounding Instructions:

This product is for use on a nominal 120-volt circuit and has a grounding plug that looks like the plug illustrated to the right. Make sure that the product is connected to an outlet having the same configuration as the plug. No adapter should be used with this product.

"WARNING", "Risk of Electric Shock, Fire, and Injury", "Review the assembly instructions to confirm that the appropriate critical components and accessories are being used with the furnishing."

Save These Instructions!

Tips for Assembly

Watch for These Helpful Symbols

This symbol denotes a 2-Person Task. For safety, please ensure that there are the suggested number of people working on steps displaying this symbol.

Watch for this symbol throughout the Assembly Guide. Wherever you see it, pay close attention. The symbol denotes a step needing extra attention to ensure it is done correctly.

The star symbol highlights an advisory note.

Before You Begin

- Lay out and identify all of the included parts.
- The hardware has been packed together in one bag.
- Read the assembly guide over once to familiarize yourself with them.

! Please note that in its unassembled state, this product contains parts that can be hazardous to small children. This product should be assembled by an adult.

As You Assemble the Unit

- Follow the steps in sequence.
- Before beginning each step, find the part(s) that you need for that step.
- Pay attention to the labels on the parts; they are there to help direct you at certain stages.
- The title of each step states what you will be doing. Review the text and the pictures as you build the unit.

Customer Service - FAQ's

For missing parts and other issues regarding the mount:

Please call Copernicus Customer Service, where we will be happy to help.

1-800-267-8494. Monday - Friday 8:00am - 4:30 pm EST.

Product Specifications

Dimensions

WARNING:
The bottom edge of the flat panel must be 20" (50.8cm) or more off the floor when the HAWM is in the fully lowered position!

WARNING:
Do not mount the HAWM over a marker ledge that is deeper than 3-3/8" (86mm)

Max Marker Ledge Depth: 3-3/8" (86mm)

Choosing the right assembly instructions

Mounting to a concrete or cinder block wall

If you are mounting the HAWM to a concrete or cinder block wall please follow these assembly instructions all the way through.

Mounting to a wood stud wall

If you are mounting the HAWM to a wood stud wall please follow these instructions to STEP 6 then continue using the instructions included with the Stud Mounting Kit (HAWM-AC1).

Adjustable wrench

2x

OR

9/16" Wrench

2x

Install Electric Lift onto Frame Assembly

- 1 Fasten bottom of Electric Lift to Frame
Route cables under Electric Lift as show

- 2 Fasten top of Electric Lift to Frame

- 3 Connect Electric Lift to Power Adapter and
secure excess cable under Velcro strap

- 4 Secure cables to frame, wrapping
Velcro strips through provided slots

Setup and Test Electric Lift

- 1** Lay the HAWM down on a table or floor near a wall outlet (within 6')

- 2** Peel clear film off of hook and loop strip and press power strip against adhesive to secure in place

- 3** Plug in the electric lift power adapter

- 4** Connect Electric Lift Remote

- 5** Plug in and turn on the power strip

- 6** Test Electric Lift before wall mounting

If there is any binding, shaking or excessive vibration when testing the lift, please contact our customer support team for assistance (see pg.5)

Install Flat Panel Mount Stretchers

! Install screws in two threaded holes

(Shown with 65" Flat Panel)

! Do not secure in these holes, they are used for attaching an optional soundbar mount

DETERMINE THE MOUNTING HEIGHT

The next two steps will walk you through determining the best mounting height for your Height Adjustable Wall Mount. Please complete each step carefully to ensure the best result.

7

Determine the (Y) value for your flat panel

Measure the distance from the bottom of the Flat Panel to the lower keyhole adapter

Lower Keyhole Adapter

Record the value for (Y) here _____

Use the value for (Y) to calculate the mounting height in the next step.

DETERMINE THE MOUNTING HEIGHT, CONT.

8

Bottom of flat panel must be minimum 20" off the floor when HAWM is in fully lowered position
Ensure the top of the flat panel will not contact the ceiling when in the highest raised position

Determine the minimum and maximum mounting height of your HAWM

- Calculate the minimum mounting height (MMH)
- Calculate the recommended maximum mounting height (MRMH)
- Record the minimum and maximum mounting height (use it in the next step)

Minimum Mounting Height (MMH)					
(Y)	+	58in (147cm)		=	(MMH)
	+	58in (147cm)		=	
Maximum Recommended Mounting Height (MRMH)					
AGE RANGE		(MMH)	+	Max Increase	= (MRMH)
4yr (JK-Gr3)			+	2"	=
8yr (Gr4-Gr6)			+	4"	=
12yr (Gr 7 +)			+	6"	=

For mounting in a common area with mixed ages (such as in a Library) mount the flat panel to accommodate the youngest users.

NOTE:
Do not mount HAWM over a marker ledge
that is deeper than 3-3/8" (86mm)

**Max Marker Ledge Depth:
3-3/8" (86mm)**

9

Actual Size:

NOT INCLUDED

1/4" Concrete Screw
(between 1-3/4" and 2-1/4" long)

1x

You will need: (Not to Scale)

Hammer Drill

1x

3/16" Masonry Bit

1x

Mark and install 1st fastener

- 1 Mark the vertical centre line where the flat panel will be mounted
- 2 Measure up from the floor and mark the Minimum Mounting Height (MMH) and Maximum Recommended Mounting Height (MRMH) calculated in the previous step
- 3 Mark the desired mounting height between the (MMH) and (MRMH)
- 4 Install 1 fastener at position (M) leaving approximately 3/8" of the threads exposed. Ensure there is a minimum of 1-3/8" of threaded fastener inside the wall

You will need: (Not to Scale)

Level

1x

Hang HAWM on fastener and mark mounting holes

1 Hang HAWM on fastener

2 Level HAWM

3 Trace mounting holes (8x) and remove HAWM from wall.

Drill Bit

1x**OR**

Drill Bit
(sized for drywall anchor)

1x**Mount Remote Hanger Bracket to wall****Can be mounted on left or right of screen.**

Velcro Strip - 8"
x3

Cable Management

- 1 Plug flat panel power cable into power strip

- 2 Plug in all cables that will be used with flat panel (USB, video, audio etc) and route them to the location where they will be attaching to the source device (laptop etc).
- 3 Using the Electric Lift Remote, move flat panel into highest and lowest position. Determine the amount of slack needed to ensure no cable will be pulled.
- 4 Use included Velcro straps to secure excess power and video cables to frame (at indicated locations).
