

# Thinking of purchasing an inexpensive cart? It's worth a second thought to consider iRover<sup>2</sup>. Here is why:

## Lifetime Warranty

All iRover<sup>2</sup> carts and wall mounts include a lifetime warranty on the cart and a 5 year warranty on the electric lift.

## Caster Size Matters

Teachers tell us all the time that casters matter. Our Idea Lab Educator Advisors told us they rearrange their classrooms monthly and some even bimonthly. With that kind of travel it is worth knowing you have a durable cart and caster to protect the investment of an expensive flat panel.

Our carts have durable 5" casters

Some competitor carts have small 3" casters

Which caster do you think will last?

## Tried & Tested

Not only is iRover<sup>2</sup> tested in actual classroom settings, we also do what is called Extreme Product Testing. We pulled the iRover<sup>2</sup> down a country road at **40 MPH, for over 6 miles**, which is the equivalent to approximately 8-10 years of use in a school environment.

## Trust

For over 30 years Copernicus has been a trusted manufacturer of classroom equipment. Call us and speak to a real human being! They will know the product, how to assemble it and how to help you with any troubleshooting you require.

## Full Lineup for Rollouts

One size does not fit all! Our Flat Panel Easel is designed specifically for primary classrooms. Our height adjustable options are perfect for schools who share their flat panels.

Just add the flat panel and you're done! Let us save you precious time by assembling your carts for you. Before you assume the shipping costs outweigh the cost of your team assembling them, call us! Our assembly fee is very reasonable.

## Affordable assembly service

## Made in Canada & TAA compliant

The Trade Agreements Act (TAA) is a designation that indicates that a product was made or significantly transformed in the US or a TAA compliant country, such as Canada. This compliance allows the iRover<sup>2</sup> line to be specified on US Government bids.

## Designed Specifically for Schools

Education is our focus and we develop products in conjunction with our Idea Lab Educator Advisors. They help us develop the right features that are the most useful in classrooms and test them in their schools. The iRover<sup>2</sup> frame was designed to give all students, including those with special needs accommodation access to the flat panel. Our design also includes optional additions like speaker and webcam mounts.

## Safe

UL Listing Pending Certification to UL 1678 in progress
