

# Thinking of purchasing an inexpensive cart?

It's worth a second thought to consider iRover<sup>2</sup>. Here is why:

## Lifetime Warranty

Lifetime warranty on the cart and a 5 year warranty on the electric lift.

## Designed for Schools

We develop products in conjunction with our Idea Lab Educator Advisors. The iRover<sup>2</sup> frame was designed to give all students, including those with special needs accommodation access to the flat panel.

## Tried & Tested

iRovers are tested in actual classroom settings. We also carry out extreme product testing. Visit our YouTube channel to see what happened.

## Caster Size Matters

Teachers tell us that casters matter. Educators rearrange their classrooms monthly and some even bimonthly. So it is important to have durable casters to protect the expensive investment of a flat panel.

## Full Lineup for Rollouts

Our height adjustable options are perfect for schools who share their flat panels.

## Flexible

Down the road when your needs have changed, you can turn your cart into a wall mount.

## Affordable assembly service

Let us save you precious time. Our assembly fee is very reasonable.

## Trust

For over 30 years Copernicus has been a trusted manufacturer of classroom equipment. Call our Customer Service Representatives - they will know the product, how to assemble it and how to help you with any troubleshooting you require.

## Safe

IFP550 UL Certified.

## Made in Canada & TAA compliant

The Trade Agreements Act (TAA) is a designation that indicates that a product was made or significantly transformed in the US or a TAA compliant country, such as Canada. This compliance allows the iRover<sup>2</sup> line to be specified on US Government bids.
